## ► Motorized Changing Tables ELUX

The multi-shift operation of electric industrial trucks requires the changing out of batteries. With the motor-driven ELUX changing table, these changes can be performed quickly, safely and economically.

The changing tables are used for installing and extracting industrial batteries into or out of an industrial truck and for transporting the battery to or from the charging station. A high degree of user ease and safety is provided by the wired remote control.

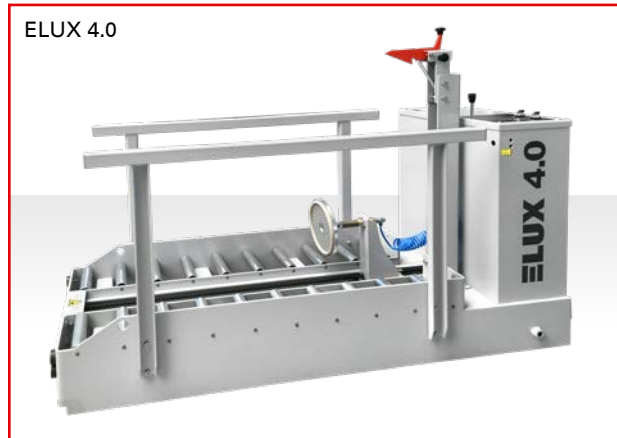

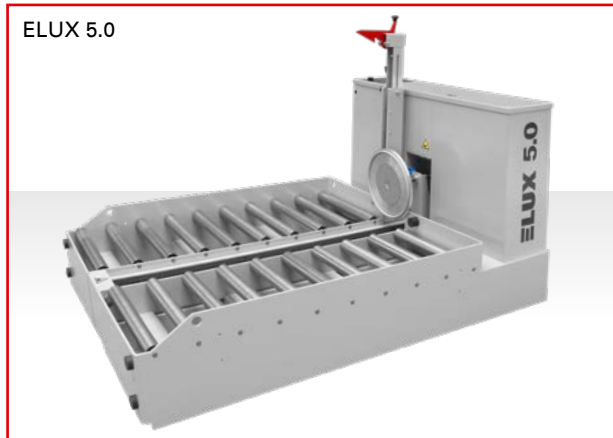

### SYSTEM FEATURES

- **Laser pointer** - allows the unit to be set to the exact installation or extraction height.
- **Quality** - powder coating, top-quality materials, high-quality workmanship.
- **Made in Germany** - utilization of steel from S235JRG2 to S355J2G3.
- **In accordance with the guidelines** - EC Machinery Guidelines, EMC Guidelines, Low Voltage Guidelines.
